Data Field - Edge 520	Specialized
Data Field - Edge 1000	Specialized
eBike Remote	Garmin
Edge Explore 1000	Garmin
Edge Touring Plus	Garmin
Selfloops Android ANT+ Accessory	Selfloops

You could also check it online at [thisisant.com](https://www.thisisant.com)

-go to <https://www.thisisant.com/>

-Click on directory

-Scroll down to the bottom left

-choose in "Profiles" "LEV" and set a mark for "Display" and "Sensor"

-click on "or" in the headline of Profiles

-Connect the Garmin to your computer

-Go to the Garmin Connect IQ Store and download the E Bike Field App

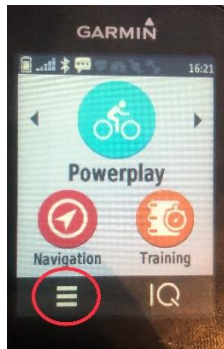

[-https://apps.garmin.com/en-US/apps/1532f0d9-fd19-4b63-b038-435d8fd670a4](https://apps.garmin.com/en-US/apps/1532f0d9-fd19-4b63-b038-435d8fd670a4)

-Install the App on your Garmin.

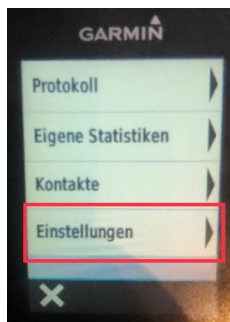

Now we could start the pairingprocess.

First we add the bike as a sensor.

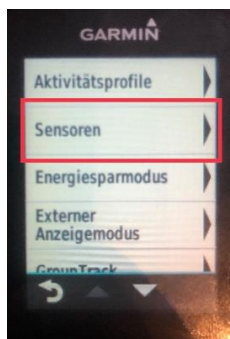

-Click on the 3 bars in the bottom left of your homescreen

-Then go to "Settings"

-Click on "Sensors"

-“Add Sensor”

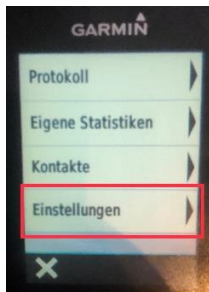

-Now start your Powerplay and the Garmin will find the Bike as a Sensor

-Confirm it and we are ready for the next Step

Bring the “E Bike Fieldapp” to your screen

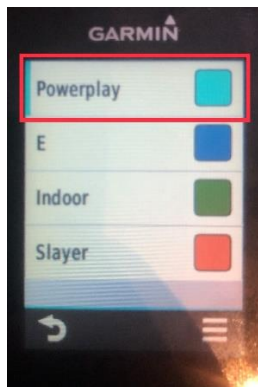

-go back to “Settings”

-click on “profiles”

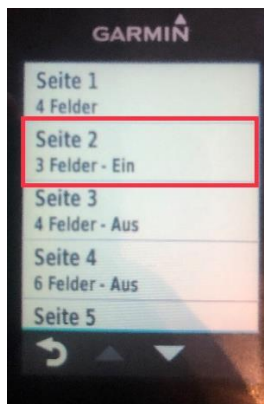

-choose a profile or create a new one (it doesn't matter which one or how you name it)

-click on "Sides"

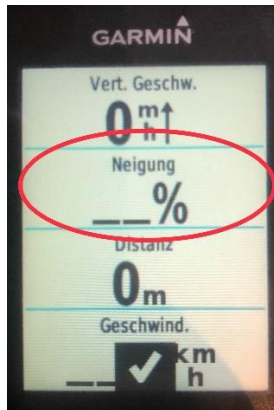

-choose a side (doesn't matter which one)

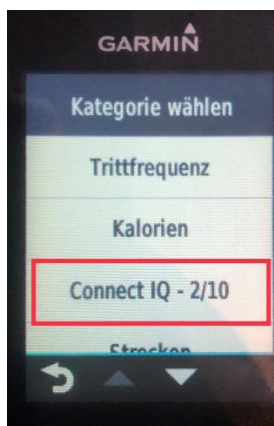

-Confirm your number of Rows and make sure the side is activated

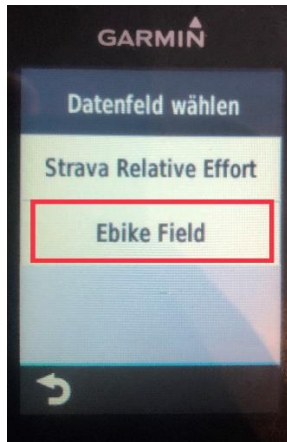

-click on a row (doesn't matter which one)

-choose "Connect IQ"

-click on "E Bike Field"

-Confirm everything and we are ready to go
